Three important drafting solutions combined with a collaborative capability and innovative features is what this version offers to any CAD user.

-Drafting workflow solutions are referring to programming customization (.Net framework), drawing management (Sheet Set Manager) and file connectivity through (PDF Underlay).

-Collaborative capability is ensured with cloud storage support. It helps design, engineering, and project team work together efficiently on a centralized platform. View and share data in the cloud using desktop and mobile devices now is possible in this version.

-Innovative features like Barcode & 2D Code will impact the way to storage and trace relevant drawing data in the CAD industry.

Moreover this version not only provides additional enhancements on daily used commands as well as a new theme interface and customization but also users have choice to select the new 64-bit operating system available. Read the brief overview of these new features below:

- .Net Framework Support
- Sheet Set Manager
- PDF Underlay
- Cloud Storage
- Barcode & 2D Code
- Commands Enhancements
- User Interface Enhancement

### .Net Framework Support

GstarCAD .NET API enables you to manipulate the application and drawing files programmatically with libraries that are exposed and can be accessed by many different programming languages and environments. Users are able to automate tasks such as creating and modifying objects stored in the database of a drawing file or change the contents of a customization file.

### Sheet Set Manager

Managing large sets of drawings manually can be complicated and time consuming. With the Sheet Set Manager, you can manage drawings as sheet sets plus manage and edit data, automate drawing set up, provide easy access to department drawings, simplify publishing/printing of the entire design set (or any part thereof).

### PDF Underlay

You can reference and place a PDF as underlay in drawing files the same as you do raster image files. You can adjust the underlay properties like contrast, fade, monochrome, and colors for background.

### Cloud Storage

Collaborative capability between different fields like design, engineering, and project team work together efficiently thanks to cloud storage support. View and share data in the cloud using desktop and mobile devices is now possible in this version.

## Barcode & 2D Code

GstarCAD 2015 introduces two innovative features Barcode & 2D Code, which will impact the way of storage and trace relevant drawing data in the CAD industry. Barcode & 2D Code can be inserted to the drawings, accomplishing identification and correspondence between paper and electronic drawings.

## Commands Enhancements

Commands like line, polyline, circle, rectangle, copy, and rotate have been enhanced through new options that help to cut-down repetitive task on basic operations.

## User Interface Enhancement

Regarding to user interface this version offers a new theme interface supplied by a customized ribbon with lighter icons that provides clearest interface, improving drawing space visualization. Furthermore users can link to our website to get information and directly download the GstarCAD mobile application through the new tab called (Applications) that has been added to the ribbon.
